GUX-xx

1. Video input GUX-00/GUX-04

Sites or machines at a distance can be monitored and checked through camera.

2. RGB input GUX-01/GUX-11

PC screens in remote locations, such as an office, can be displayed on-site. Reducing the time required to check various data.

3. RGB output GUX-02

By monitoring the MONITOUCH screen on a large display you can easily check production status.

4. Video input + RGB input GUX-10

Supports two input signals. While displaying surveillance video from a camera, you can also monitor image processing equipment.

Usage examples

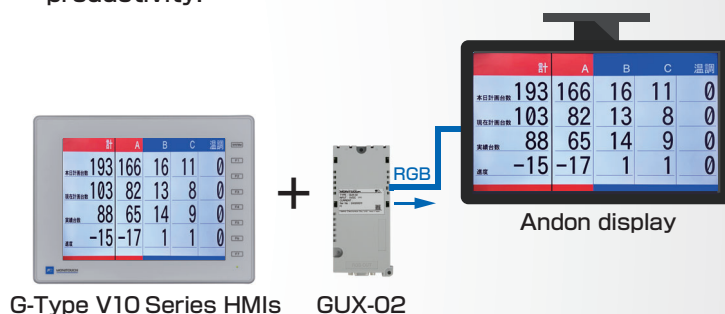

■ GUX-01 (RGB input)

Integrating the image processing monitors into the V10 will reduce costs.

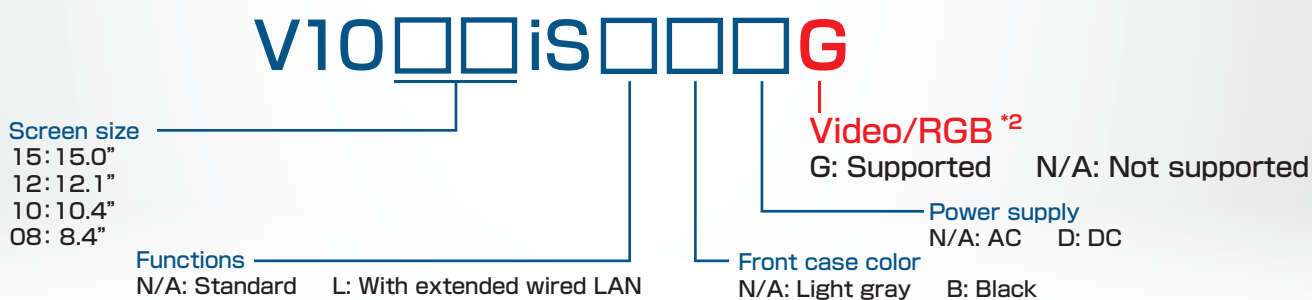

■ GUX-02 (RGB output)

Outputs the production status on an Andon display. A large display makes it easy to understand important information such as error occurrence, which enhances productivity.
