# TELLUS and V-Server Ver. 4 - V9 supported!
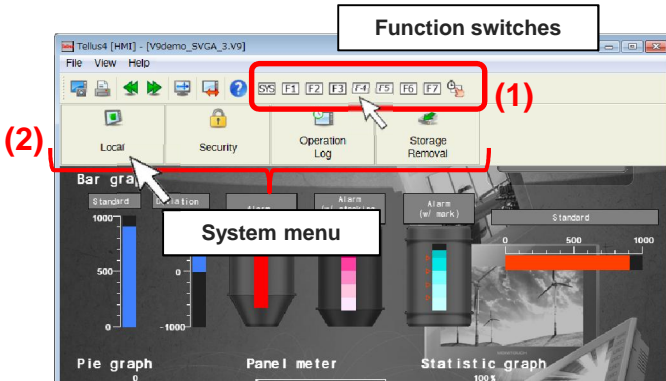

**- V9 functionalities are achievable (TELLUS-HMI)**
**- Data collection through V9 connecting to PC via Ethernet (V-Server)**

## TELLUS-HMI

### Large and high resolution full HD display is possible.

**Full HD display**
1920x1080 dots

**Magnifying and scrolling a screen is possible with mouse operation**

### You can operate local screen, system menu, and function switches.

Function switches (1)

(2) Local

System menu

🔍 **Click [SYS] and then [Local]…**

**Local screen**

You can display the local screen.

### Connectable devices are largely increased.

Connectable devices are equivalent to V9.
PLCs/temperature controllers/inverters that were not compatible with TELLUS
Ver. 3 or earlier are now available.
*Devices that requires CUR-xx is not available. (OPCN1/CC-Link/T-link/Profibus-DP/SX bus/DeviceNet/FL-net/EtherCAT)

### TELLUS Ver.4 also supports Ver. 3/Ver. 2 capabilities.

| Version (file name) | Supported screen program |
|---|---|
| TELLUS Ver. 4 (Tellus4.exe) | V9 series (*.V9 file) |
| TELLUS Ver. 3 (Tellus3.exe) | V8 series/TS2060 (*.V8 file) |
| TELLUS Ver. 2 (Tellus.exe) | V7 series/V6 series (*.V7/*.V6 file) |

## V-Server

**Information at the factory floor can be acquired through Ethernet if your factory floor has MONITOUCH there.**

Production data
Log data
Alarms etc. …

V9 series

It is easy and time-saving to access MONITOUCH from my office!

TS2060i

Ethernet

V-Server Ver. 4 supports from V9 to V7 as well as TS2060i. Seamless data collection is possible.

V8 series

V7 series

**One application software for new and legacy models!**
