[Useful Tips]
Let's compare various remote monitor functions to choose the right feature!

What is Remote Monitor ?

It is a function to monitor or operate the MONITOUCH screen at a distant place.

Remote site

You can grasp what's going on with a remote monitor without having to go there!

➡ **There are two types of remote functions available in the V9 series!**

Remote functions that V9 series support are VNC Server and TELLUS-Remote.

Site

VNC Server

Use VNC viewer software on PC, smartphone, or tablet for easy monitoring and remote control!
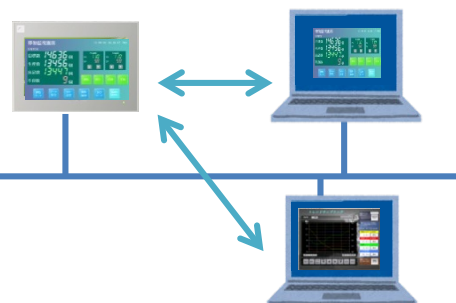

OR

TELLUS-Remote

You can simultaneously monitor and remotely control V9 from multiple PCs with dedicated software, TELLUS and V-Server installed!
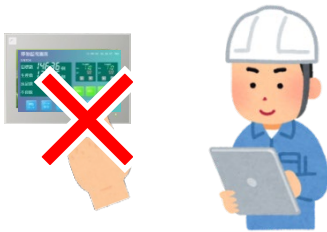

Office

Ethernet
