

Remotely apply electronic signatures to daily / monthly reports

Before

Daily and monthly reports must be electronically signed by a supervisor, but going to the production site each time is a hassle...

Supervisor

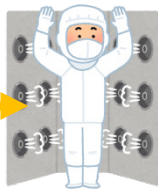

I have to go to the production site again. Gearing up to enter a cleanroom each time is such a hassle.

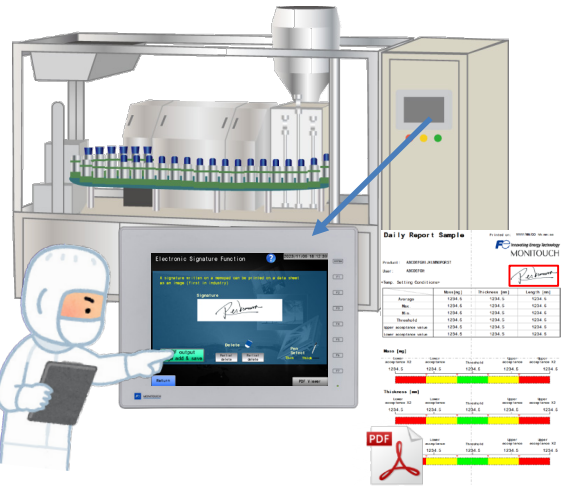

Office

Air shower

Production site (cleanroom)

Approval signatures can be applied remotely by using the VNC server function!

After

Approval signatures can be applied via a PC or tablet while in the office.

Office

Supervisor

Since I can apply my signature remotely from the office, there is no need for running around and I can work more efficiently.

Production site (cleanroom)

Check the next page for details!

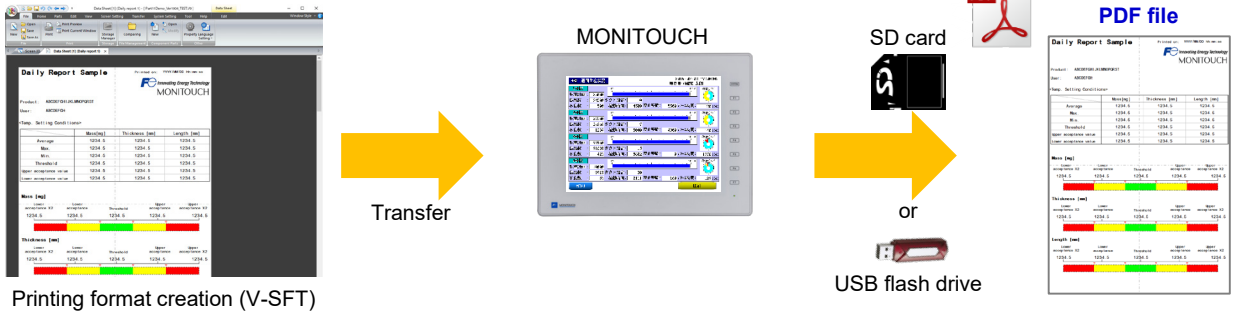

Electronic signature and remote operation are achieved using the following functions.

* Applicable models: V10, V9 series

Electronic signature

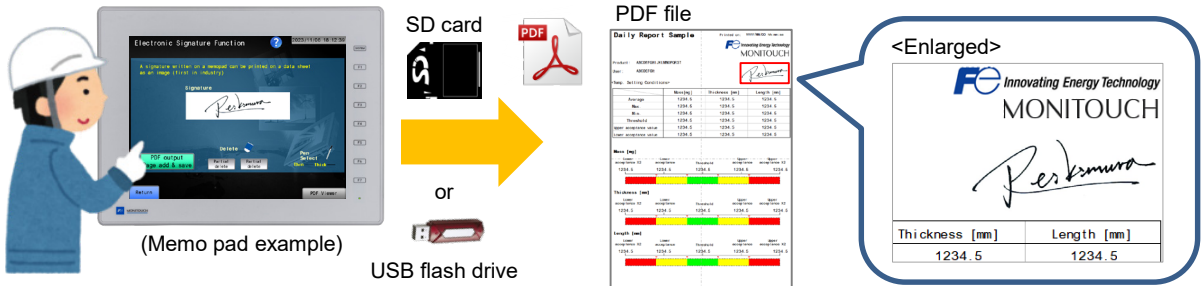

Extended data sheet function (PDF file output)

- PDF files can be saved to a storage device using a printing format created in advance.

Memo pad function

- You can sign your name by hand. By importing it to the data sheet, a PDF file with a signature can be saved.

Remote operation

VNC server function

- Connection to and remote operation of MONITOUCH is possible. Devices with the VNC client app installed can be used.

- A VNC client app made by Hakko Electronics is available.

OS	VNC client app	Remarks	Download from
Android		Freeware, Hakko Electronics brand (dedicated to MONITOUCH)	Google Play 
iOS			AppStore
