

## Remote Desktop Additional Functions Information

### Merits of Remote Desktop Functions

- Ability to engage PC functions at low-cost price at a place where it is difficult to place PCs due to environment resistance.
- Ability to check the production information of sampling/managing by PCs remotely from your factory
- Any manuals are digitally integrated and are able to contribute for cost reduction and environmental conservation.

Remote desktop functions become much easier to use by adding more functions to V-SFT-5 Ver.5.4.14.0

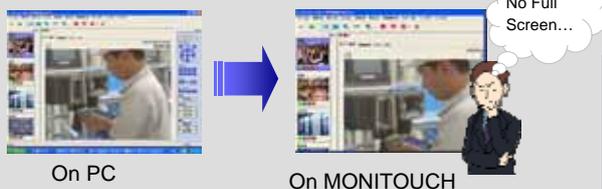

#### Function Enhancement **1** Displaying PC Screens in full screen (Reduced Size Display)

In the case that PC resolution differs from the size of MONITOUCH resolution, MONITOUCH automatically controls the size gap, and displays the full screen of the PC display on MONITOUCH.

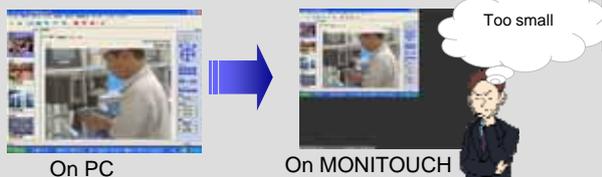

Example: In the case PC is 1024 x 768 dots and MONITOUCH is 800 x 600 dots.

#### Past

1) Same size

2) Reduced size (one-half)

#### Present

PC images display in full screen on MONITOUCH regardless of any difference in display size

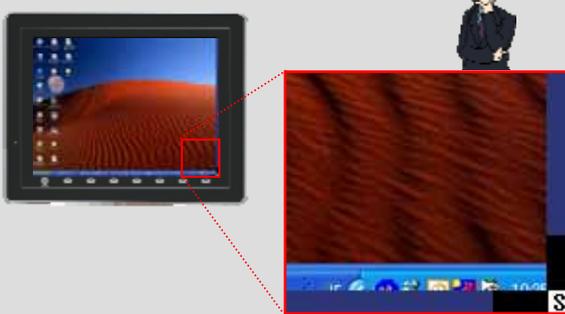

#### Function Enhancement **2** Show/hide Scroll Bars

If the resolutions of PC and MONITOUCH are the same, scroll bars are not automatically displayed.

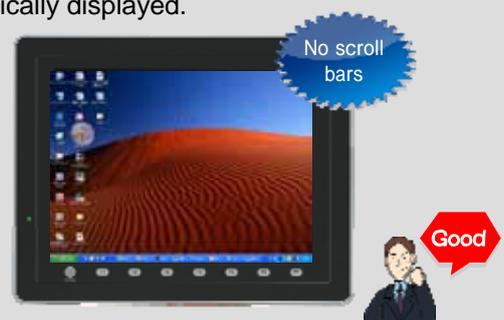

#### Past

Even when the resolutions were the same, MONITOUCH always showed scroll bars.

#### Present

When the display is the same or has been automatically resized to fit, scroll bars are not automatically displayed.

**Introduction case**

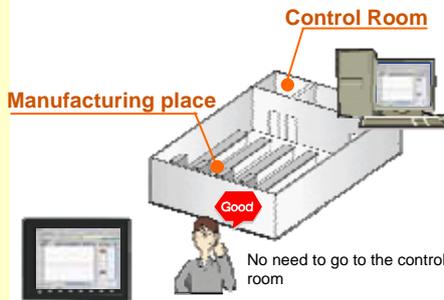

By connecting MONITOUCH and PC remotely, MONITOUCH can function in various ways.

**- Production Terminal**

In manufacturing facilities where it is hard to place PC, it is possible to display information on MONITOUCH instead.

**- PC-dedicated Application**

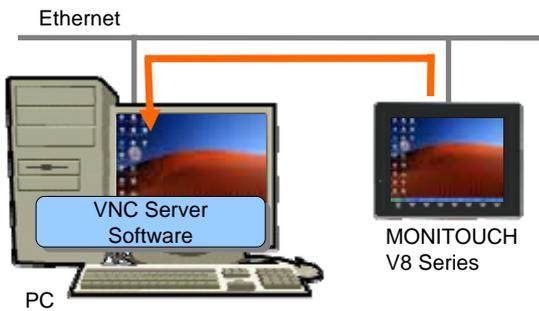

Various production information of a central PC in a control room is able to be seen on MONITOUCH.  
No need to go to the control room

**- Manual Display**

In the case of system error, the ability to display PC images offers digitally integrated manuals.

**[Remote Desktop Example]**

**Supported Models**

V815iX, V812iS, V810iS, V810iT, V810iC, V808iS, V808iC, V808iCH, V806iT, V806iC

- Not supported with V806iM. Supported with 32Kcolors or more and analog system
- Each PC connecting to a MONITOUCH V8 Series needs one license. (Model: V-RemoteDT)

**-VNC Server Software**

- Remote Desktop is an application that gives you the ability to see PC images on MONITOUCH with downloaded VNC remotely through Ethernet.
- It is necessary to install VNC Server Software in a PC.

**Free version upgrade of the configuration software V-SFT-5**

The configuration software (upgraded version) can be downloaded from the following website.

(Membership registration is required.)
