

V-SFT Update Information V-SFT-5 (Ver. 5.4.31.0)

V-SFT-5 has been updated to Ver. 5.4.31.0.
Some of the new functions are introduced in this MONITOUCH+EXPRESS.

- (1) Enhanced Alarm acknowledge function.
- (2) Windows Font is improved.
- (3) Repeat speed of calculation Switch improved

For more information of updated function, click the following URL!!

http://www.hakko-elec.co.jp/mainte/data/en/download/Update_info/V-SFT_Updateinfo_V5.4.31.0.pdf

(1) Enhanced Alarm acknowledge function

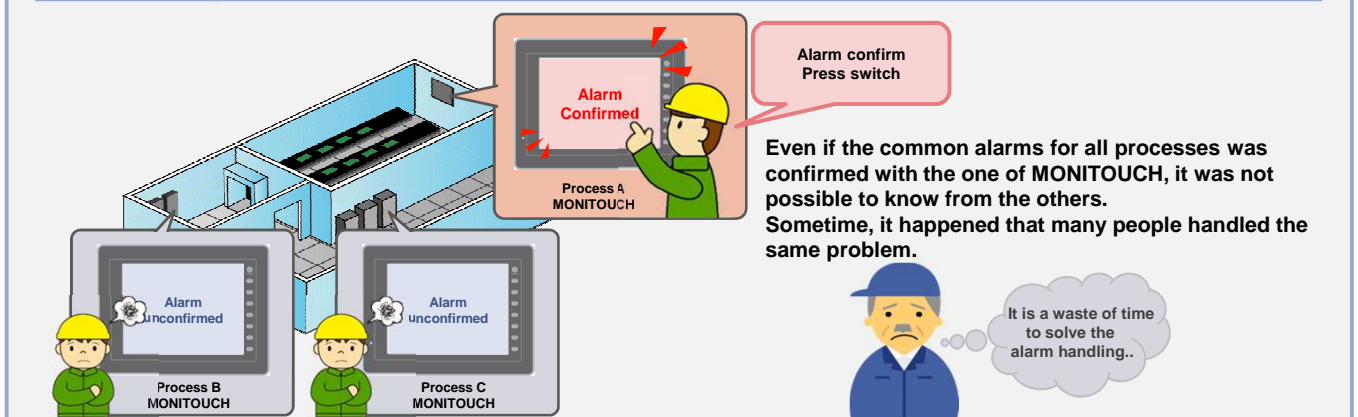

Alarm acknowledge function is available to share with multiple number of MONITOUCH!

Model: V8 Series, S8 Series, TS Series

Alarm confirming operation can be shared by "Acknowledgement Display Bit Memory Address" when the multiple MONITOUCH communicate with one PLC.

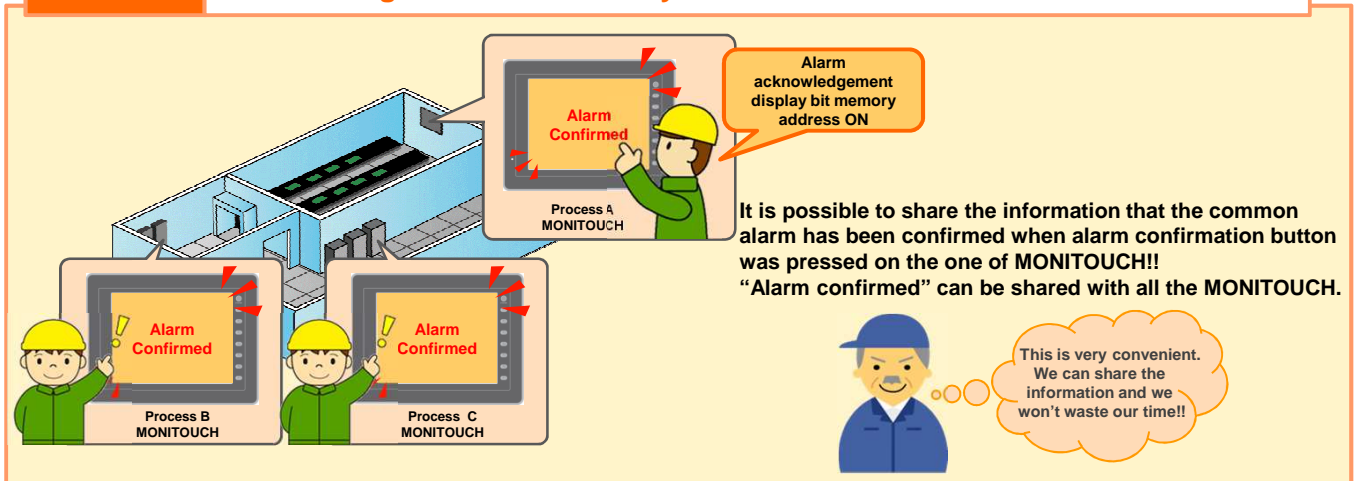

Before

Alarm acknowledgement was executed on each MONITOUCH...

After

Acknowledgment is executed by PLC bit address at once!

(2) Windows Font improved

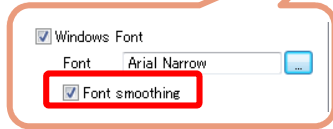

Smooth Font is available!!

Model: TS Series

[Conventional appearance]

Smooth Font
 [Smooth appearance]

This function is to cover the jaggy by using the anti-aliasing. Smooth font is a good-looking font. Which gives clean and crisp view to the character expression.

[Object items]

- Text/Multi-text
- Num. display/Char. display
- Message (Registration Item)
- Switch/Lamp
- Graph (Num. display)

[Restriction]

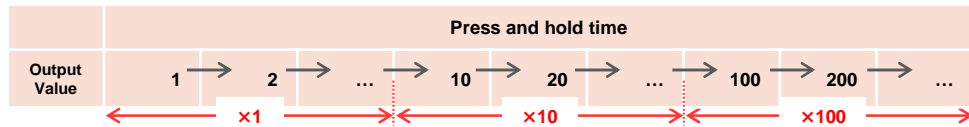

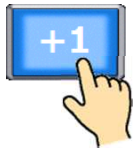

- It is available with 32K-color mode or 64K-color mode.
- Transparent function is unavailable.
- Only True Type font is supported. (Bitmap font is not supported.)
- Blink function of back color cannot be displayed properly.

(3) Repeat speed of calculation Switch improved

Adding/subtracting speed up depending on the holding time of the calculation switch!

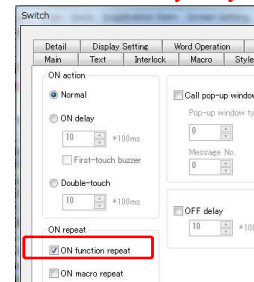

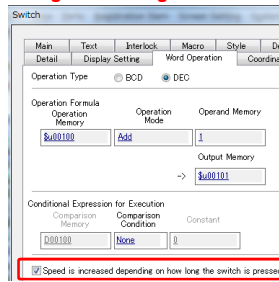

Model: V8 Series, S8 Series, TS Series

Operation speed increases when you press a button longer.

Adding/subtracting value are increased to 10 times more by every 10 times of repeat operation.

* See the images on the right for the setting.

You only need to check [Speed is increased depending on how long the switch is pressed]! *If [ON function repeat] is not checked, it is automatically checked by V-SFT.
